Humble-Bee Bumble Bee loved to fly,

To eat from the flowers, and soar towards the sky,

The lizards would watch, they were all quite amazed,

How Humble-Bee Bumble Bee flew as he grazed.

@KristyGlas

Humble-Bee humbly flew under and over,

He flew through the daisies, the roses, the clover,

The squirrels would watch as they foraged for scraps,

As Humble-Bee Bumble Bee buzzed through the gaps.

@Kyloren_NFT

"How do you fly? Asked the snake in the grass.

"Your body's so big and your wings move so fast!"

Humble-Bee Bumble Bee buzzed as he laughed,

He flew through the trees with finesse as he passed.

@money_alotta

The crow saw the bee point his stripes towards the sky,

The lizard just watched ‘cause he just couldn’t fly,

The squirrel looked up with his cheeks packed with food,

The crow gave a caw and went after the dude.

@KatSheKittyBast

"Hey, Humble-Bee Bumble Bee, wait up for me!

I just have a question, a good one, you'll see!"

Humble-Bee Bmble Bee stopped for the crow,

"I'll humor you once, but then I must go!"

@iH0DL

"I see every day as you fly through the air,

Your body so big under yellow-black hair,

Your wings move quite fast, but they are oh so small,

It doesn't make sense that you don't ever fall!"

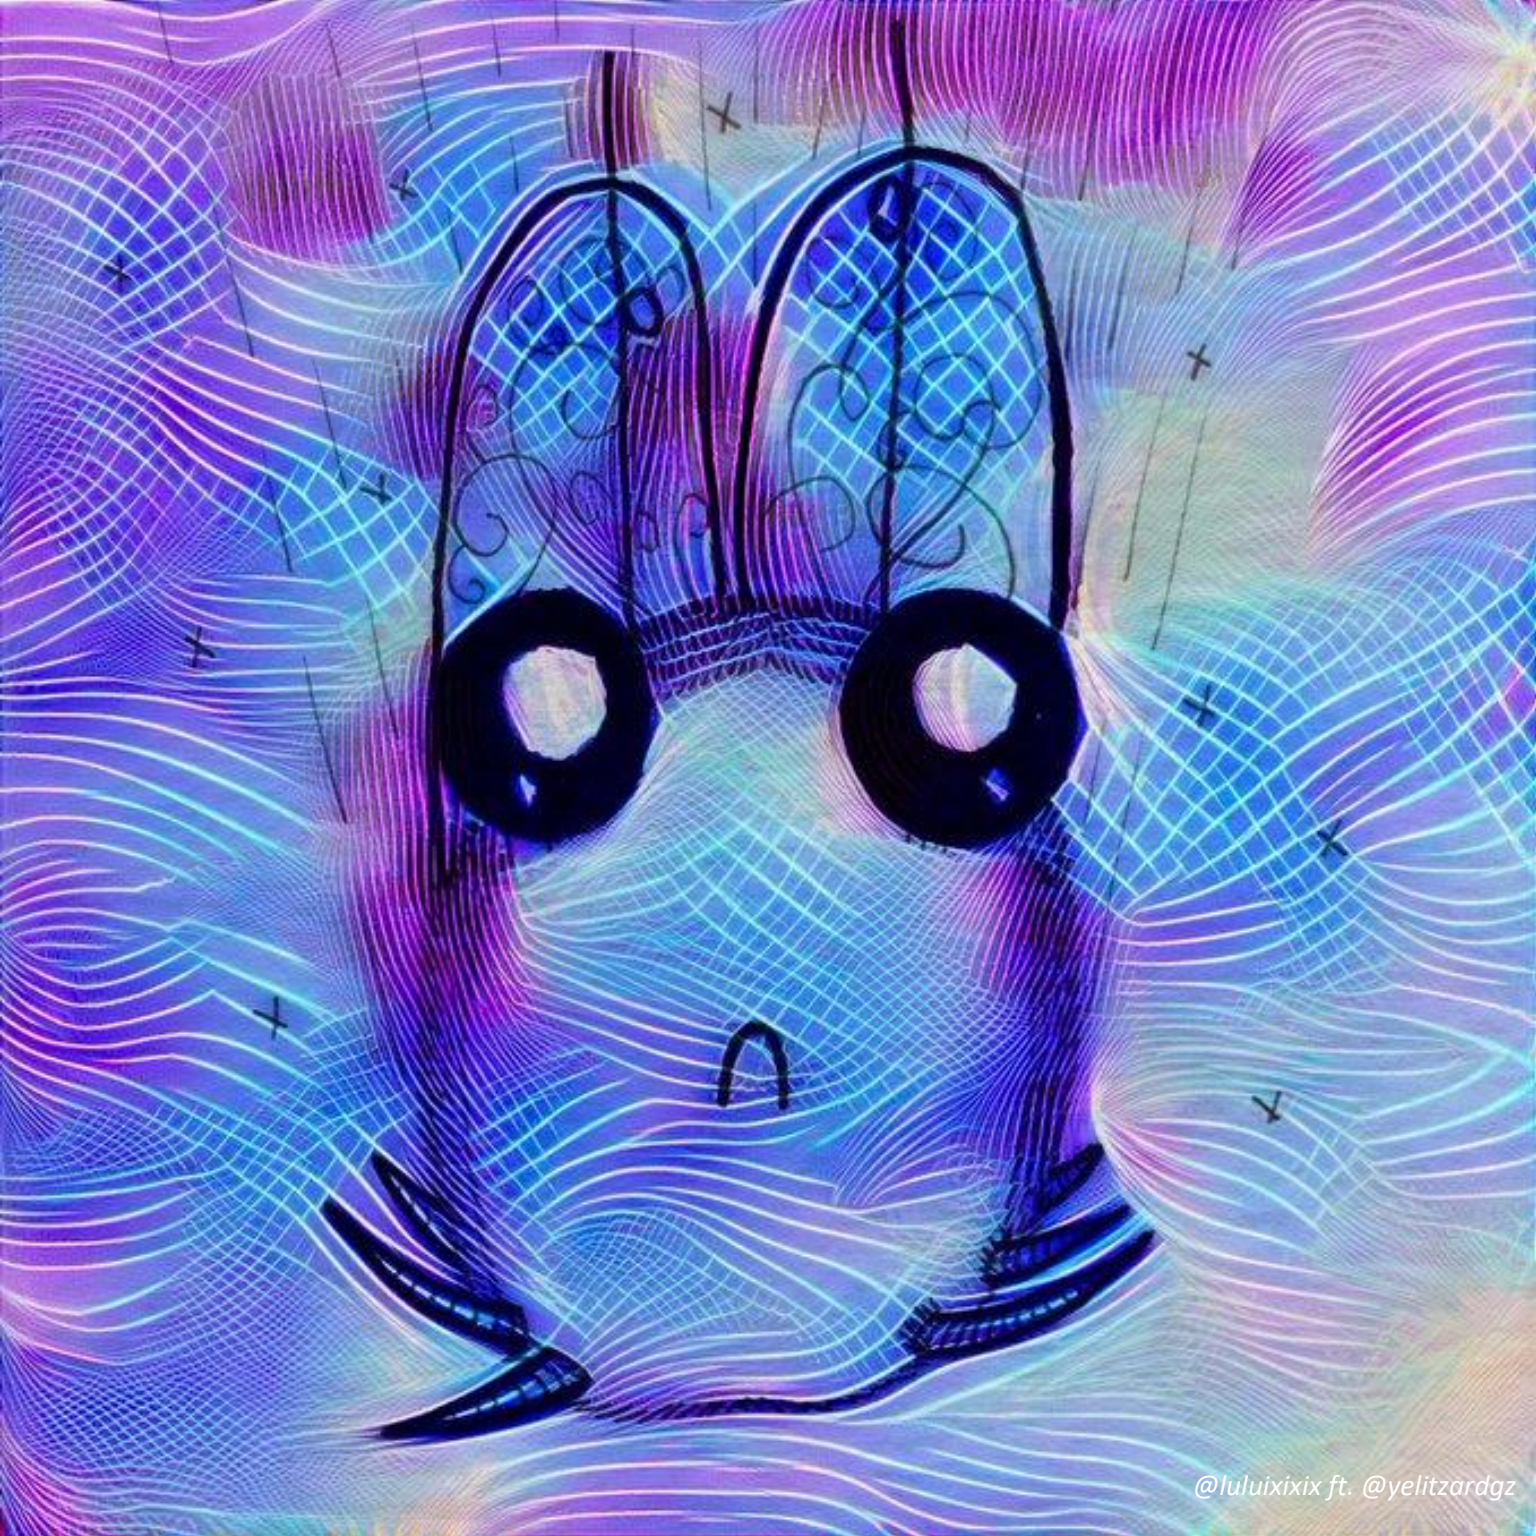

@cryptoyuna

Humble-Bee Bumble Bee paused for a few,

He buzzed and he buzzed, and he stewed as he chewed,

He never had taken a moment to care,

How his fluffy old self could stay up in the air.

@luluixixix ft. @yelitzardgz

Without further adieu he flew off with a buzz,

With unanswered questions and simply because,

He flew to the clouds and then made a steep dive,

He flew to his queen who looked after the hive.

@AdamFryda

"I'm sorry to bother you, Queen, but I'm stumped!

I'm *really* quite flustered; I'm caught in *a* slump!

The *animals* ask how I stay in the air,

They question my flight, they *all* stop and stare!"

@theAngieTaylor

"Our bodies are big and our wings are quite small,

And we have extra weight that we all have to haul,

The secret to why we can fly and don't fall,

Has to do with a thing we call 'Dynamic Stall.'"

@WizardX_0x

Humble-Bee Bumble Bee tilted his head,

He fluttered his wings, gave a buzz, then he said,

"What is this secret called Dynamic Stall?

How does it keep us from taking a fall?"

@BanillaGrilla

"It creates a vortex of air for our wings,

It helps with the lift of us heavier things!"

She buzzed and continued on with her recital,

"It works with our wings' oscillation cycle!"

AR Enhanced with Artivive App @BoyaGeorge

So Humble-Bee Bumble Bee flew off in haste,

With a pollen filled smile on his yellow-black face,

Humble-Bee humbly flew under and over,

He flew through the daisies, the roses and clover.

@An0nym0usNobody

He buzzed for the lizard, he buzzed for the crow,

He buzzed for the squirrel, and they all said "Hello!"

"I figured out how I can stay in the air,

Though I'm heavy and have smaller wings that I wear."

"Dynamic Stall is a special effect,

That occurs when my wings change their pitch on my back,

It creates a vortex that gives me my lift,

With my wing's oscillation, it keeps me adrift!"

@lordeh_biontic

@lordeh_biontic

The crow was impressed, and the lizard was too,

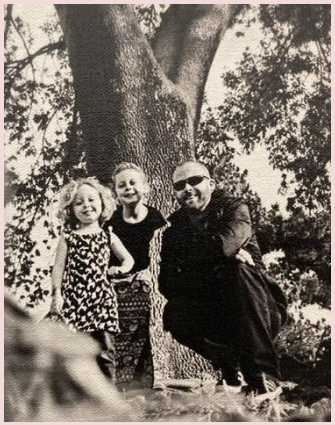

The squirrel stopped stirring his hot acorn stew,

And Humble-Bee Bumble Bee buzzed out of sight,

Wished his friends a good day, spread his wings and took flight.
